HDPE plastic products manufacturer · Elbasan, Albania

- 01 Modular HDPE Floating Dock Systems
- 02 Packaging Accessories Manufacturing
- 03 HDPE Plastic Container Manufacturing

HDPE Floating Dock Bolt Connector

The floating dock bolt connector is manufactured from high-density polyethylene (HDPE) and is designed to securely fasten modular pontoon systems. This fastening element ensures strong interlocking and maximum structural stability in water environments.

TECHNICAL SPECIFICATIONS

Floating dock bolt connector, HDPE material, threaded fastening system with locking nut, UV and corrosion resistant, quick and secure installation, compatible with modular floating platforms.

HDPE Floating Dock Connector Pin

The floating dock connector pin is manufactured from high-density polyethylene (HDPE) and is designed to securely connect and lock modular pontoon systems. It ensures maximum structural stability and safe interlocking between floating platform modules.

TECHNICAL SPECIFICATIONS

Connector pin for modular pontoon systems, HDPE material, UV and corrosion resistant, easy installation, compatible with floating dock platforms.

Modular Floating Plastic Platform

The modular floating plastic platform is manufactured from high-density polyethylene (HDPE) and designed for the construction of floating docks, plastic pontoons, and marine structures. Its modular design allows easy interconnection, creating stable and secure floating surfaces.

TECHNICAL SPECIFICATIONS

Modular floating platform, HDPE material, UV and saltwater resistant, 4-point connection system, anti-slip surface, high load capacity, low maintenance, blue color (custom options available).

Plastic Tap for Drums and Industrial Containers

The industrial plastic tap is designed for installation on plastic drums and containers, allowing controlled and safe dispensing of liquids. Manufactured from durable HDPE/PP material, it ensures high resistance to chemicals, pressure, and frequent industrial use.

TECHNICAL SPECIFICATIONS

Industrial plastic tap, HDPE/PP material, threaded drum/container connection, airtight sealing system, chemical-resistant, ergonomic flow-control lever, red/black color (custom options available).

Industrial Plastic Cap with Safety Ring

The industrial plastic cap with safety ring is manufactured from durable HDPE/PP material and is designed for secure sealing of plastic drums and industrial containers. Its heavy-duty construction provides high resistance to pressure, impact, and chemical substances, ensuring safe storage of the contents.

TECHNICAL SPECIFICATIONS

Industrial plastic screw cap with safety ring, HDPE/PP material, airtight sealing, tamper-evident ring, high resistance to pressure and chemicals, black color (custom colors available), suitable for plastic drums and industrial containers.

Standard Plastic Screw Cap

The standard plastic screw cap is manufactured from high-quality PP/HDPE material and is designed to provide secure and airtight sealing for plastic bottles and containers. Its durable construction ensures leak prevention, contamination protection, and safe storage during transport and warehousing.

TECHNICAL SPECIFICATIONS

Plastic screw cap, PP/HDPE material, airtight sealing, resistant to moisture and chemicals, blue color (custom colors available), suitable for plastic bottles and containers.

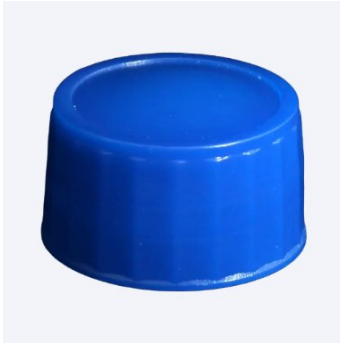

Heavy-Duty Plastic Screw Cap

The heavy-duty plastic screw cap is manufactured from high-quality HDPE/PP material and is designed for secure sealing of industrial plastic drums and containers. Its robust construction ensures high resistance to pressure, impact, and chemical substances, providing maximum protection of the contents.

TECHNICAL SPECIFICATIONS

Industrial plastic screw cap, HDPE/PP material, airtight sealing, high resistance to pressure and chemicals, heavy-duty design, red color (custom colors available), suitable for large plastic drums and containers.

Plastic Screw Cap

The plastic screw cap is manufactured from high-quality PP/HDPE material and is designed to provide secure and airtight sealing for plastic bottles and containers. Its classic threaded design ensures leak prevention, contamination protection, and safe product storage.

TECHNICAL SPECIFICATIONS

Plastic screw cap, PP/HDPE material, airtight sealing, resistant to chemicals and moisture, blue color (custom colors available), suitable for plastic bottles and containers.

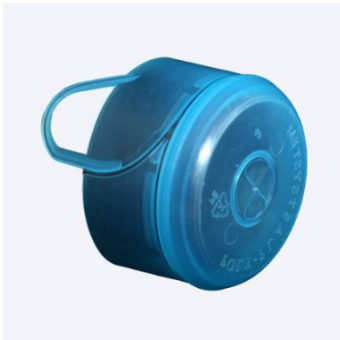

Plastic Flip-Top Cap

The plastic flip-top cap is manufactured from high-quality PP/HDPE material and is designed for secure sealing and controlled dispensing of liquids such as detergents, cleaning products, shampoos, liquid soaps, and cosmetic products.

TECHNICAL SPECIFICATIONS

Plastic flip-top cap, PP/HDPE material, airtight sealing, controlled dispensing system, resistant to detergents and chemical products, suitable for plastic bottles used in cleaning and hygiene industries.

Plastic Cap for 5-Gallon Container

The plastic cap for 5-gallon containers is manufactured from durable plastic material (HDPE/PP) and is designed to provide a secure and airtight sealing for large water containers and liquid storage. Its construction ensures leak prevention, contamination protection, and content preservation.

TECHNICAL SPECIFICATIONS

Plastic cap for 5-gallon containers, HDPE/PP material, airtight sealing, tamper-evident ring, integrated handle, resistant to pressure and moisture, suitable for drinking water and food-grade liquids.

200L Plastic Drum

The 200-liter plastic drum is manufactured from high-density polyethylene (HDPE) and is designed for the safe storage and transportation of liquids in industrial, commercial, and food-grade applications. Its reinforced cylindrical body provides very high mechanical strength, stability during storage, and long-term durability under heavy-duty use.

TECHNICAL SPECIFICATIONS

200L plastic drum, HDPE material, reinforced cylindrical body, wide-mouth airtight screw cap, high impact and chemical resistance, suitable for food products, liquids, dairy products, chemicals, and industrial use.

Plastic food packaging container

The plastic container for food packaging is manufactured from food-grade high-density polyethylene (HDPE) and is designed for the storage and transportation of cheese in brine and other food products. The material is safe for food contact and does not affect taste or quality.

Plastic Bottle for Dishwashing Liquid – 800 ml (Fairy)

The 800 ml plastic bottle for Fairy dishwashing liquid is manufactured from high-density polyethylene (HDPE) and designed for the packaging, storage, and controlled dispensing of dishwashing detergents in household and professional use. Its larger capacity makes it ideal for frequent daily use, offering convenience and efficiency.

TECHNICAL SPECIFICATIONS

HDPE plastic bottle, 800 ml capacity, suitable for dishwashing liquids (Fairy), white color (custom options available), dispensing cap, ergonomic and chemical-resistant.

Plastic Bottle for Dishwashing Liquid – 400 ml (Fairy)

The 400 ml plastic bottle for Fairy dishwashing liquid is manufactured from high-density polyethylene (HDPE) and designed for the packaging, storage, and controlled dispensing of dishwashing detergents in household and professional use. Its compact size makes it ideal for everyday use while saving storage space.

TECHNICAL SPECIFICATIONS

HDPE plastic bottle, 400 ml capacity, suitable for dishwashing liquids (Fairy), white color (custom options available), dispensing cap, ergonomic and chemical-resistant.

Plastic Bottle for Acid – 900 ml

The 900 ml plastic bottle for acid is manufactured from high-density polyethylene (HDPE) and is specifically designed for the safe packaging, storage, and dispensing of acidic and corrosive chemical liquids. The HDPE material provides excellent chemical resistance, ensuring safety and durability during use.

TECHNICAL SPECIFICATIONS

HDPE plastic bottle, 900 ml capacity, suitable for acids and corrosive chemicals, white color (custom options available), leak-proof screw cap, high chemical resistance.

Plastic Container for Bleach

The plastic container for ACE (bleach / sodium hypochlorite) is manufactured from high-density polyethylene (HDPE) and is specifically designed for the safe storage and transportation of aggressive chemical liquids. This container offers excellent chemical resistance, ensuring material stability during continuous use.

TECHNICAL SPECIFICATIONS

HDPE plastic container, suitable for bleach (ACE) and chemical liquids, white color (custom options available), leak-proof screw cap, ergonomic side handle, high chemical resistance.

4L Plastic Container

The 4L plastic container is a 4 liter HDPE container manufactured from high-density polyethylene (HDPE) and designed for the safe storage and transportation of liquids in light industrial, commercial, and household applications. This 4L plastic container offers lightweight handling, good impact resistance, and practical everyday use.

TECHNICAL SPECIFICATIONS

4L HDPE plastic container, white color (custom options available), leak-proof screw cap, integrated handle, suitable for light industrial, commercial, and household liquid storage.

5L Plastic Container

The 5L plastic container is a 5 liter HDPE container manufactured from high-density polyethylene (HDPE) and designed for the safe storage and transportation of liquids in light industrial, commercial, and household applications. This 5L plastic container offers good impact resistance, lightweight handling, and practical everyday use.

TECHNICAL SPECIFICATIONS

5L HDPE plastic container, white color (custom options available), leak-proof screw cap, integrated handle, suitable for light industrial, commercial, and household liquid storage.

20L Plastic Container

The 20L plastic container is a 20 liter HDPE container manufactured from high-density polyethylene (HDPE) and designed for the safe storage and transportation of liquids in industrial and commercial applications. This industrial plastic container 20L offers high impact resistance, long-term durability, and excellent storage stability.

TECHNICAL SPECIFICATIONS

20L plastic container HDPE, white color (custom options available), leak-proof screw cap, integrated handle, suitable for industrial and commercial liquid storage.

28L Plastic Container

The 28L plastic container is a 28 liter HDPE container manufactured from high-density polyethylene (HDPE) and designed for the safe storage and transportation of liquids in industrial and commercial applications. This 28L industrial plastic container offers high impact resistance, long-term durability, and excellent storage stability.

TECHNICAL SPECIFICATIONS

28L HDPE plastic container, white color (custom options available), leak-proof screw cap, integrated handle, suitable for industrial and commercial liquid storage.

30L Plastic Container

The 30L plastic container is a 30 liter HDPE container manufactured from high-density polyethylene (HDPE) and designed for the safe storage and transportation of liquids in industrial and commercial applications. This 30L industrial plastic container offers high impact resistance, long-term durability, and excellent storage stability.

TECHNICAL SPECIFICATIONS

30L HDPE plastic container, white color (custom options available), leak-proof screw cap, integrated handle, suitable for industrial and commercial liquid storage.
